

Modular Fire Plate Carrier - M.F.P.C.

The MFPC (Modular Fire Plate Carrier) is designed as a Fire and EMS scalable body armor carrier system that is available in six different variations to accommodate exactly what your department needs are. The MFPC will accommodate all sizes of optional hard armor or soft armor. With a fully adjustable cummerbund and shoulder straps, the MFPC is versatile and can accommodate different body types. Front and Rear plate pockets can accommodate either Level IIIA soft armor or Level III / IV Rifle Plates. A "Bunker Gear" front pocket is available to hold an IFAK / Radio. As well as a cummerbund, available with or without a MOLLE system for additional load carrying capacity as well as capabilities of inserting Level IIIA soft armor. Premium 3M Triple Trim Reflective Striping.
